What's New in Version 2025.2.0

Welcome to the release notes for MRI ProLease Central Version 2025.2.0. This document outlines the latest features, improvements, and fixes introduced to enhance your experience with the platform.

Behind the Scenes Improvements: As MRI ProLease Central continues its integration with other MRI Software products, this release includes foundational updates that align application workflows and technical infrastructure with MRI's unified platform standards. These improvements set the stage for upcoming user-facing enhancements—such as expanded integrations with MRI Contract Intelligence (MCI) and deeper connectivity with MRI PMX.

User Interface Updates: You may notice incremental changes to the user interface as we continue refining page layouts and addressing usability issues. These enhancements are part of our ongoing effort to deliver a more intuitive and efficient user experience.

Bug Fixes: This release includes a number of bug fixes that improve stability, performance, and consistency across the application. Your feedback has helped us identify and address these issues to ensure smoother day-to-day operations.
